

**I would really be grateful if you start to build the Developing Timer, that you go to the Photrio thread and say hi. Also please post photos of your completed timer.**

Please refer to Photrio for further build help & to let us know you are building the timer.

[Build a B&W film developing timer & twiddler - Cheap, Easy & it Works | Photrio.com Photography Forums](https://www.photrio.com/forum/threads/build-a-b-w-film-developing-timer-twiddler-cheap-easy-it-works.1000000)

V1.0 10—2-2024

The screen is a 4" TFT display, measuring 60 x 90mm, so plenty big enough to see. Below are some early screenshots. The current version has improved display.
